

INSTALLATION INSTRUCTIONS

Push Cord Lock

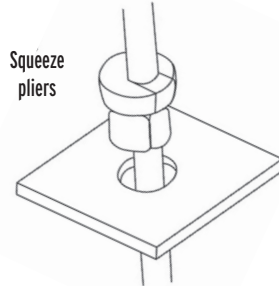

WORKS BEST WITH:

Horseshoe FARMD-Bar Flat or Angle - 3, 4, 6
Circle FARMD-Bar Flat or Angle - 3, 4, 6

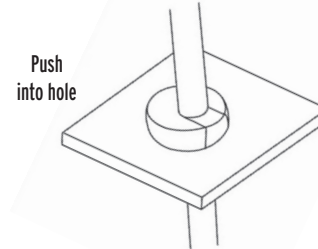

1. Snap front and back pieces of the cord lock around vertical float cable at desired length

2. Drop cord lock and cable into the topside of desired hole in FARMD-Bar.

3. To lock cable in place, turn cord lock so front and back seams of cord lock are aligned, followed by a 1/4 turn locking the Push cord into place within the FARMD-Bar.

The opening on the cord lock and the opening on the FARMD-Bar are staggered with the FARMD-Bar opening to prevent the cord lock coming out.
